Dynamic Pro X

Extra-Robust Automatic Pool Cleaning Technology for Public Pools...

Maytronics, for over 20 years the world leader in reliable automatic public pool cleaning technology, introduces a new level of durability in robotic cleaning – the Dolphin ProX.

Specially designed for the level of cleaning that professional pool management demands, the Dolphin ProX boasts hardened brush axles, a reinforced long-lasting track, and a heavy-duty brushless impeller motor.

...Getting Your Pool Cleaner in Less Time, with Less Hassle

The Dolphin ProX thoroughly scrubs, vacuums, sweeps, and filters your pool from waterline to floor in less than six hours. Patented learning software intelligently scans the pool, and advanced dual-motor maneuverability allows the Dolphin ProX's onboard computer to choose and implement the most efficient cleaning path – including walls, stairs and waterline.

Absolute Safety and Unrivalled Reliability

Like all Maytronics pool robots, the Dolphin ProX has undergone rigorous testing to ensure complete operational safety, and conforms to both UL and CE safety standards. Maytronics' patented cable swivel keeps the ProX's cable from tangling, and the splash-proof poolside power supply boasts a clogged filter bag indicator to ensure constant cleaning efficiency.

Backed by the Experts in Automated Pool Cleaning

Dolphin from Maytronics is the recognized international leader in advanced pool maintenance. With unmatched robot reliability and easy-accessible local service centers around the world, the Maytronics name has become synonymous with quality, innovation and performance.

Dynamic ProX with remote control

Recommended for public pools of up to 25 meters in length.

Dolphin ProX Advantages:

- Heavy-duty design for long-lasting performance with minimum service.
- Automatic, self-learning cleaning programs for ultra-efficient and fast cleaning cycles.
- Wireless remote control allows manual programming and navigation.
- Flexible maneuvering covers pool walls, floor and even stairs.
- Patented cable swivel keeps power cable from tangling.
- Clogged filter bag indicator to ensure constant cleaning efficiency.

Wide Range of Cleaning Programs

- **Regular** - floor and wall cleaning program.
- **Ultra clean** - slower movement + greater suction for more intensive cleaning.
- **Waterline** - for special attention to the waterline.
- **Lap Pool** - suitable for narrow and long lap pools.

Cycle time

4 - 8 hours

Technical specifications

Suction rate (self-controlled) 79 gal/min (USA) 18,000 l/h

Filter bag

Porosity 50 micron - TUV Inspected - 90% efficiency

Motor unit

Voltage 25 VDC 25 VDC

Power supply

Input 115 VAC/100 VAC 230 VAC

Output 30 VDC 30 VDC

Rated output 115 VAC - 150 W 230 VAC - 150 W

Splash-proof IP 64 IP 64

Dimensions

Unit weight (w/o cable) 24 lb. 11 kg.

Cable length 100 ft. 30 m.

Shipping weight 70.4 lb. 32 kg.

Shipping dimensions 23.5x19.6x19.6 in. 60x50x50 cm.

Warranty two years or 3,000 operating hours.
