Water Pressure System®

Polaris 380

Fast and light

After several years research on motor design, we have created a swimming pool robot that is lighter and, more important faster, thanks to a smaller frame and a new transmission system. Following these improvements, we have developed a new venturi-effect system based on 3 jets, which are triangular-mounted to ensure impeccable cleaning quality.

The Advantages of the Polaris 380:

- 3 powerful jets
- Optimised travel
- Automatic reverse travel
- Automatic antilock recoil valve
- Integral bottom and sides coverage
- Greater speed
- Fast, easy installation
- Compact shell
- Extremely light
- Very reliable

X3
JETS POWER

General and Technical Characteristics:

Type of system	Booster pump power
Hydraulic pressure	1 hp
Motorisation	Working pressure
Booster pump coupled to the filter system	1.8 bar
Suction	Suction size
3-jet venturi system	6 cm
Travel	Dedicated sweeper socket line
Random + automatic reverse	16-bar rigid pipes
Litter capture	Weight
Separate bag + sweep hose	2.5 kg
Guarantee	Speed of travel
2 years	20 m/min
For use in	Hose length
All types of pool	9.60 m

The Polaris 380 is designed to suck up:
